

SECOND FLOOR / SPATIAL COMPOSITION

A continuous narrative, distinct experiences

01 Content threads

Talent and achievement, openness, adaptation, and commerce recur across the stories. They provide connected ways of reading Qi culture throughout the exhibition.

02 Spatial rhythm

The lobby introduces the experience; the preface hall establishes its cultural context; the first unit unfolds through people, choices and events. The circular arrangement connects these episodes into a legible journey.

03 Media placement

Mirror spaces, digital sand tables, projections and conversations offer different encounters with the same cultural narrative. Their placement considers circulation and the separation of light, sound and visitor activity.
